Including provision of tender preparation and bid management services

UK and internationally

tropical coastal waters

Clients: Various.

Services provided:

- Project winning
- Project management
- Overseeing of all coastal engineering matters
- Client relationship management

ENBE Ltd. has provided project management services for various projects in the UK and internationally, including large/ prestigious projects where particular personnel criteria were required (e.g. previous country experience, qualifications, or specific technical experience). Project management services have been provided:

- in the United Kingdom, including, for example:
 - coastal strategy studies, feasibility and design of coastal defence works.
- internationally, including, for example:
 - coast protection feasibility and design studies in the Arabian Gulf and Caribbean region;
 - navigation studies in the Arabian Gulf;
 - due diligence for design of marine works in India;
 - concept beach management studies in Malta.

Our services have included:

- assistance in the preparation of tenders and negotiations with prospective clients, leading to project award;
- project management services during the execution of projects including financial control, client representation, technical/quality control and team management;
- post project follow-up including the promotion and delivery of downstream projects.
